DANIEL LALOUSH

Brief:

I am a full-stack developer. I am known for being a fast learner, which helps me to adapt to any situation in the smoothest way possible, and under high pressure, I stay resilient to the goal.

My programming skills started at school and essentially got develop with Microverse which is a remote software development program that uses pair programming and project building to teach development. As far as now, I am pro efficient in HTML5, CSS3, Sass, JavaScript, Ruby, SQL, MySQL, PostgreSQL, and learn well enough Rails, React, and Redux Framework.

Work Experience:

TSE (Technical Support Engineer) at Microverse

April 2020 – Present

My job consists of reviewing students' projects and given then feedbacks for then to fulfill the requirements using the best programming practices, also from time to time student reach to us for a better understanding of their current task.

Content Writer at Microverse

June 2020 – Present

My job consists of writing three unique articles per month related to Microverse or programming.
